Parameters

- **pager** (`Pager, optional`) – A pager object, or None to use `SystemPager`. Defaults to None.

- **styles** (`bool, optional`) – Show styles in pager. Defaults to False.

- **links** (`bool, optional`) – Show links in pager. Defaults to False.

Return type

PagerContext

Example

```
>>> from rich.console import Console
>>> from rich.__main__ import make_test_card
>>> console = Console()
>>> with console.pager():
        console.print(make_test_card())
```

Returns

A context manager.

Return type

PagerContext

Parameters

- **pager** (`Pager | None`)

- **styles** (`bool`)

- **links** (`bool`)

pop_render_hook()

Pop the last renderhook from the stack.

Return type

None

pop_theme()

Remove theme from top of stack, restoring previous theme.

Return type

None

print(*objects*, *sep=' '*, *end='\n'*, *style=None*, *justify=None*, *overflow=None*, *no_wrap=None*, *emoji=None*, *markup=None*, *highlight=None*, *width=None*, *height=None*, *crop=True*, *soft_wrap=None*, *new_line_start=False*)

Print to the console.

Parameters

- **objects** (`positional args`) – Objects to log to the terminal.

- **sep** (`str, optional`) – String to write between print data. Defaults to " ".

- **end** (`str, optional`) – String to write at end of print data. Defaults to "\n".

- **style** (`Union[str, Style], optional`) – A style to apply to output. Defaults to None.
